

SUMMARY

Enterprise software deployment operator with 6+ years across product management, revenue operations, and customer-facing implementation, including enterprise AI. Translate complex workflows and technical constraints into production systems, scalable product capabilities, and measurable business outcomes.

PROFESSIONAL EXPERIENCE

Product Manager, Braze

2024 - 2025

- Led Braze's RCS launch across 11 markets, coordinating Engineering, GTM, Google, CPaaS partners, and customer teams to initiate 40 enterprise deployments within 90 days and secure a Google RCS for Business partnership
- Owned SMS and RCS product and deployment strategy, translating customer demand, carrier readiness, and platform constraints into investments supporting 50%+ YoY ARR growth and 13% YoY customer growth
- Reduced engineering support cases by 40%+ over three quarters by building a structured feedback and prioritization system across Support, Product, and Engineering
- Launched an internal AI prototyping program enabling 100+ employees to develop and share reusable AI-assisted workflows

Product Manager, ASAPP

2022 - 2023

- Led a Fortune 100 AI implementation, translating operational workflows into engineering plans and resolving product and UX tradeoffs, helping retain an at-risk account and support a multimillion-dollar expansion
- Owned scope, conversational QA, and release readiness for an AI-assisted conversation-closing feature, reaching 50% agent adoption within two weeks
- Led WhatsApp Business rollout from MVP to enterprise platform integration, translating third-party API constraints into production capabilities and reaching 2M+ users in 30 days while preserving security and workflows

Product Manager, Artsy

2021 - 2022

- Redesigned marketplace search and ranking, contributing to 25% YoY growth in average order value and doubling monthly marketplace sales

Sales Operations Manager, Artsy

2018 - 2021

- Redesigned contract-to-cash across Salesforce, NetSuite, and Celigo, reducing administration time by 50% while improving governance, auditability, and forecasting
- Built Salesforce workflows, validation rules, approval logic, and integrations that embedded pricing and contracting controls into operations
- Consolidated fragmented revenue reporting into an executive decision system for forecasting, planning, board preparation, and GTM reviews
- Built self-service commission analytics using Redshift and Salesforce for 65+ sales representatives, saving more than 100 hours per quarter

EDUCATION

University of Chicago

2013 - 2017

- B.A. Economics, Minor in Art History, Dean's List Honors

TOOLS & PLATFORMS

Technical: SQL • Python • APIs • Salesforce • NetSuite • Celigo • Looker • Snowflake • Redshift

Deployment & AI: Customer-facing implementation • Systems integration • Workflow redesign • Customer discovery • Technical scoping • Change management • LLM workflow design • Evaluation design • Prompt engineering • Retrieval and grounding • Human-in-the-loop workflows
